TOPi® Socrates Release Notes 2024-10

TOPi® Socrates 2024.10.0 provides new automatic reporting functions and, in addition, several new or improved ease of use features in many tools.

TOPi® Socrates 2024.10.0 covers ability to send defined reports automatically to email receivers or third-party data interfaces. In addition, automatic graphical view has improved as well. Automatic, up-to-date reports are available effectively e.g. by using mobile devices, without system user tools. It can be also chosen whether the defined Balancer data is visible in EMS Guideline view or Production Plan view only. Dashboard gauges can illustrate bad values by red color, and many more improvements picked up, to facilitate your daily work. TOPi® Browser Socrates keeps you in track in production data monitoring and reporting.

Supported browsers:

- Mozilla Firefox ESR 128
- Mozilla Firefox ESR 115
- Google Chrome (latest version at the time of release)
- Microsoft Edge (latest version at the time of release)
